(S5.C.1.b.i(a) and (b) – Required by March 31, 2021 and January 1, 2023) The City Comprehensive Surface Water Plan characterized its drainage basins and watershed. As a result, surface water issues and solutions were identified. Projects were then listed for design and construction. The City also developed a proactive approach to LID. Increased inspections to reduce noncompliance with BMP requirements, provided additional training to maintenance staff, restructured inspection program to maximize enforcement efforts. Enhanced tracking and reporting functions with Lucity to ensure maintenance is conducted and documented adequately.
